DETAILED ACTION

Receipt and entry of Applicant's Preliminary Amendment dated September 29, 2005 is acknowledged.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination including a control device for regeneration of the filter, wherein upon the execution of control for regeneration of the filter, raises the temperature of the exhaust gas, by performing delay multi-step injection control in a state of closing the exhaust throttle valve, when the exhaust temperature detected by the first exhaust temperature sensor is a given first determining temperature or less; and controls to open the exhaust throttle valve in a stepwise or continuous manner after the exhaust temperature detected by the first exhaust temperature sensor has risen to a given second determining temperature or higher, in such a way that the exhaust temperature detected by the second exhaust temperature sensor rises to a given third determining temperature or higher.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of six patents:
